Master the art of **timber roof** erection

This hands-on programme combines **practical training** with essential **technical knowledge** to prepare participants for real-world site work.

Endorsed by the Institute for Timber Construction South Africa (ITC-SA), this industry-recognised course **equips participants** with the skills needed to safely and efficiently erect timber roof trusses to **professional standards**. Aligned with South African building regulations and best practices, the training promotes safety, **quality workmanship**, and job readiness — empowering learners to **build with excellence** and grow their opportunities in the construction industry.

COURSE CONTENT

- Introduction to roof erecting and truss installation
- Materials and equipment
- Safety, health and legislation
- Setting out and preparing the work area
- Erecting roof trusses
- Special roof construction elements
- Final checks and professionalism

At the end of the programme, delegates will be able to:

- **Interpret roof plans** and read layout drawings
- Select and **use roofing tools** and materials correctly
- Erect and **align timber trusses** safely and according to building codes
- **Prepare the site** and ensure safety at all stages of work
- **Install complex elements** like valleys and hips with accuracy
- **Perform final checks** and engage in professional site conduct

WHO SHOULD TAKE THIS COURSE?

- Construction workers seeking formal **upskilling**
- Roofing assistants and site installers
- **Entrepreneurs** in the building sector
- Individuals preparing for **Recognition of Prior Learning (RPL)**

DELIVERY MODE

- Gauteng and Cape Town focus (contact us for other regions)
- **In-person** practical training (worksite or Roofing Academy facility)
- Theory available **online** or face-to-face
- Group bookings available nationwide

TRAINING DURATION

The **3–6 month duration** of the programme is designed to offer flexible learning pathways through either **part-time** or **full-time** study. The modular structure facilitates progressive learning while ensuring that participants meet all academic requirements, including the completion of written assessments and the Work-Integrated Learning (WIL) logbook, in accordance with institutional quality standards.

ASSESSMENT AND CERTIFICATION

All delegates who complete the summative assessment will be assessed, moderated, and receive an SOR (Statement of Results)
